

June 2019

Dear Parents,

We've used IXL to reinforce our curriculum this year, and your child will continue to have free access to the online program over the summer months. IXL can be accessed through any device with internet, including handheld devices such as iPhones, e-readers and tablets.

As we look towards the topics covered in the beginning of the fifth grade math curriculum, we are asking that students work on two skills per week. We chose these practice skill sets from the fourth grade to be practiced over the summer.

**Topic A. Place Value**

\*A.16      \*A.3  
\*A.20      \*A.4

**Topic D. Multiplication**

\*D.1      \*D.9  
\*D.23     \*D.25

**Topic E. Division**

\*E.1      \*E.20  
\*E.7      \*E.23

**Topic T. Decimals**

\*T.10      \*T.15  
\*T.12      \*T.17  
\*T.13      \*T.19

**Topic U Add/Subtract Decimals**

\*U.1      \*U.3  
\*U.2      \*U.5

*Did you know?*

*Studies have found that students lose one to two months of math and reading skills over the summer. You can play an important role in preventing this "summer slide" by encouraging your child to continue learning!*

Fifth grade is a special year in your child's life and education. Let's work together to ensure that students don't go down the "summer slide". We look forward to the next school year.

Sincerely,

Fifth Grade Teachers
